

SELL + GROW: one engine, one audit trail

Buyer and merchant flows both run through the same control plane, and both write their steps to the **same live audit feed** below. Click any action on either side and watch its events appear instantly.

Chain integrity: **VERIFIED**

0 events

Why this matters: both the buyer's payment steps and the merchant's campaign steps flow through the **same deterministic control plane** and land in **one append-only audit ledger**. No matter where an AI acts — buying a product or growing a store — a person can always see it and it can never hide.
