

Sell to AI buyers — a real, safe checkout.

A trustworthy checkout where an AI helps you buy, but AegisPay validates, authorizes and verifies. Red is reserved for the single action that moves money; everything else stays calm and precise.

1 Propose → 2 **Validate** → 3 Policy → 4 Risk → 5 Approve → 6 Razorpay → 7 Verify → 8 Audit

**AegisPay · ABC Store**

shopping-agent v3 · secure

Find running shoes under ₹4,000 for daily running.

Type a message...

Ask

S1 · Chat

Enter: your request. See: subtle loading + typing while the AI works; it states prices are the store's.

aegispay core · intent compiler

Behind the scenes

how your sentence becomes a database search

core

WHAT YOU TYPED

"Find running shoes under ₹4,000 for daily running."

PARSED, TYPED INTENT (JSON)

```
{
  "action": "discover & buy",
  "product": { "type": "running_shoes", "category": "shoes/running" },
  "quantity": 1,
  "budget_max_minor": 400000,
```

```
"attributes": { "use_case": "daily_running" }
}
```

validated schema-checked before use.

USED TO SEARCH THE MERCHANT CATALOG

```
select * from products
where tenant_id = :store and status = 'active'
  and category = 'shoes/running' and price_minor <= 400000;
```

3 found Prices come from the database — the AI never makes them up.

S1b · Parse → JSON → search

See: the pipeline — text → typed JSON intent → validated → a real, parameterized catalog query. This intent is hashed into the Passport.
